Preface vii

Captions to photographs viii

Photographs ..... ix–xii

Notes on ecotone attributes and functions
by J. Kolasa & M. Zalewski 1–7

Ecotones in lakes and reservoirs

Land/water ecotone effects in reservoirs on the fish fauna
by A. Duncan & J. Kubečka 11–30

The role of ecotones as feeding grounds for fish fry in a Bohemian water supply reservoir
by J. Matena 31–38

Biomass of planktonic crustaceans and the food of young cyprinids in the littoral zone of Lake Balaton
by A. Simonian, I. Tátrai, P. Bíró, G. Paulovits, L.G.-Tóth & G. Lakatos 39–48

Biomanipulation by ecotone management in a lowland reservoir
by M. Zalewski, P. Frankiewicz & M. Nowak 49–60

Relationship between the spatial scale and biotic variability in a wetland ecotone
by J. Kolasa & L. Weber 61–67

Streams

Critical landscape attributes that influence fish population dynamics in headwater streams
by I.J. Schlosser 71–81

River/land ecotone: scales and patterns
by G. Bretschko 83–91

Riparian ecotones and spatial variation of fish assemblages in Portuguese lowland streams
by M.J. Collares-Pereira, M.F. Magalhães, A.M. Geraldes & M.M. Coelho 93–102

Morphological variability in the ecotone – an important factor for the conservation of fish species richness in Swiss rivers
by A. Kirchhofer 103–110

Ecotones and fluvial regimes in arctic lotic environments
by G. Power & M. Power 111–124

Microhabitat use by two small benthic stream fish in a 2nd order stream
by I. Zweimüller 125–138

Large rivers and floodplains

The dependence of fish community structure and dynamics on floodplain and riparian ecotone zone in Parana River, Brazil
by A. Agostinho & M. Zalewski 141–148

An outline of lateral fish migrations within the Central Delta of the Niger River, Mali
by V. Bénech & M. Peñáz 149–157

The influence of high waters on stream fish populations in regulated rivers (Abstract)
by T. Spindler 159–161

Extension and role for fish populations of riverine ecotones along the Sinnamary river (French Guiana)
by L. Tito de Morais, M. Lointier & M. Hoff 163–179

Management aspects of streams and rivers

River restoration concepts – goals and perspectives
by S. Muhar, S. Schmutz & M. Jungwirth 183–194

The effects of recreated instream and ecotone structures on the fish fauna of an epipotamal river
by M. Jungwirth, S. Muhar & S. Schmutz 195–206

Effect of removal and regeneration of bankside vegetation on fish population dynamics in the Warta river, Poland
by T. Penczak 207–210

Effects of siltation on stream fishes and the potential mitigating role of the buffering riparian zone
by C.F. Rabeni & M.A. Smale 211–219

Evolutionary aspects

Evolutionary adaptations by fish to ecotonal complexity in spatially variable landscapes – a perspective
by M.M. Coelho & M. Zalewski 223–228

The genetic structure of roach populations in two contrasted large rivers
by Y. Bouvet, J.L. Maslin, E. Pattee & M. Bobin 229–234

The land/inland-water ecotones and fish population of Lake Valley (West Mongolia)
by Y.Y. Dgebuadze 235–245

Zonation of a lentic ecotone and its correspondence to life history strategies in fish
by J. Wanzenböck & K. Keresztessy 247–255

Epilogue

Land/Inland water ecotones: intermediate habitats critical for conservation and management
by F. Schiemer, M. Zalewski & J. Thorpe 259–264
